PROFESSIONAL SUMMARY

M.S. Artificial Intelligence (GPA 4.0, exp. Jun 2026) with experience in algorithm implementation, data analysis, and evaluation pipelines. Currently a Graduate Research Assistant implementing matrix-based algorithms for Topological Data Analysis. Strong foundation in data processing, retrieval systems, and model evaluation. Prior industry experience in software engineering and data-driven system optimization.

CORE SKILLS

- Languages: Python, Java, SQL, Cobol, Jcl
- Frameworks & Libraries: TensorFlow, Keras, scikit-learn, CNN-LSTM, Pandas, NumPy, OpenCV, GUDHI
- LLM & NLP Systems: LangChain, Hugging Face Transformers, RAG, Prompt Engineering, Semantic Search
- APIs & AI Models: OpenAI API (GPT-4o-mini), Semantic Scholar API
- Tools & Platforms: Git, Jupyter, Unix/Linux, REST APIs
- Soft Skills: Collaboration, Communication, Documentation

EXPERIENCE

Graduate Research Assistant - DePaul University

Sep 2025-Present

- Implementing a matrix-based algorithm for computing harmonic chain barcodes in Python.
- Translating mathematical specs into clean, tested, and documented code. Evaluating algorithm performance and stability.

Application Development Analyst, Accenture, Bangalore, India

Oct 2021-Aug 2024

- Developed and maintained COBOL batch programs, delivered a self-service troubleshooting module, reducing client support tickets by 20%.
- Optimized SQL queries and caching, boosting API response times by 60%.
- Led code reviews and sprint demos, ensuring clear communication with stakeholders..

Data Science Intern, Verzeo, Bangalore, India

Aug 2020-Nov 2020

- Built Random Forest model (85 % accuracy) to predict the outcome; integrated into BI dashboards.
- Conducted exploratory data analysis and feature engineering to drive actionable insights.

Web Developer Intern, ClearExam, Bangalore, India

Nov 2020-Jan 2021

- Developed responsive websites, reducing bounce rate by 30%; collaborated with designers to improve UX.

PROJECTS

- **Agentic RAG System for Cleantech Question Answering** - LangChain, ChromaDB, MiniLM, GPT-4o-mini
- **Diabetic Retinopathy Detection** - Python, OpenCV, SVM, Random Forest
- **Energy Load Forecasting** - TensorFlow, CNN-LSTM, SHAP

EDUCATION

M.S. Artificial Intelligence, DePaul University - GPA 4.0, Presidential Scholarship

B.E. Computer Science, MVJ College of Engineering - CGPA 8.71

PUBLICATION

"House Price Prediction Using Machine Learning," International Journal for Research in Applied Science & Engineering Technology, Aug 2021.
